Chicago, IL 60606

RE: Site-Specific Safety, Environmental and Fire Protection Training Video

Dear Greg:

I would like to convey my sincere appreciation for a job well done. It was a pleasure working with Solid Line Media during the entire production of the above referenced video; from script writing through final editing Solid Line Media made an extra effort to ensure that the end product was exactly what we wanted.

Your creativity in regards to the animation request was outstanding and your willingness to incorporate special needs during final editing was appreciated. The crew that was at the facility to shoot site-specific footage was professional, polite and very respectful of all the employees at the facility while efficiently completing the work in a timely fashion.

The video will be used to train new hires and contractors and will enable the employees that normally perform the training to complete other duties. Not only will the video make training less costly it does it in an entertaining way.

Sincerely,

Bonita Berry  
Environmental and Loss Prevention Coordinator
